INTRODUCTION TO CAREFREE COMMUNITY EMERGENCY MANAGEMENT PLAN

PURPOSE & SCOPE

The Carefree Emergency Management Plan (CEMP) explains the processes, procedures, and tools put in place to prevent, prepare for, respond to, recover from, and mitigate against emergencies. This plan provides basic information, resources, and checklists that address emergency event planning and response. Our goal is to provide a dynamic Emergency Management Plan that will facilitate effective community preparation and recovery from five types of emergencies: **Fire, Dangerous Intruders (Active Shooter), Hurricanes**, other **Weather-Related Emergencies** (Non-Hurricane Weather Events, Tornado, Lighting Strikes, Flood, etc.) and **Health/Pandemics**. Representatives from the BoA the BoD and Carefree Managers have developed this plan cooperatively.

This plan puts forth the responsibilities of the ROCB to protect community property and assets. The ROCB is not responsible for individual residents and their property nor for communicating emergencies to individuals. Residents should get emergency communication from official channels, both local and national, such as Lee County (alertLee.com), the American Red Cross, the Florida Department of Agriculture and Consumer Services (wildfires), the National Weather Service, etc. The ROCB does not sanction the Community Emergency Response Team (CERT).

Owners and residents should not rely on the association for their personal safety and security. The association's staff, boards, and vendors may be completely unavailable or unable to access the property. Florida community associations are not built or designed to serve as a first response organization, and it is highly likely that the association will not have sufficient personnel in the moments leading up to and after a devastating event to guarantee everyone's safety.

METHOD & SCHEDULE FOR EVALUATION, MAINTENANCE, AND REVISION

- The CEMP is updated regularly and submitted for board approval every four years by a work group consisting of board members and volunteers from the community.
- The CEMP relies on the emergency plans of other agencies, where noted.
- The CEMP is reviewed at least biennially, or because of exercises and/or events.
- A printed copy of the CEMP will be in the Clubhouse Conference Room. Multiple copies of the checklist will be included. It is also in an electronic document on a secure, shared site that maintains a change record, time/date stamps, and is version controlled.
- The EM work group, led by the BoA and BoD and/or designees, coordinates with designated points of contact for identified partner agencies/stakeholders to collaborate on updates/edits.

SITUATION

Geographic Info The Resort on Carefree Boulevard is located on the Southwest Gulf coast of Florida between latitude 26°43’49” N and longitude 81°54’22” W. Carefree Resort is located within Lee County, and the borders of Lee County are formed by the following: Charlotte County forms the northern boundary, Glades County touches the county on the very northeastern tip, Hendry and Collier Counties form the east boundary, Collier County forms the southern boundary and the Gulf of Mexico forms the western boundary. Lee County is approximately 1,212 square miles. Three hundred ninety-nine (399) square miles is surface water, and eight hundred thirteen (813) square miles is land area. Salt-water wetlands comprise 12.5% or 102 square miles of the Lee County’s land. The County topography is generally flat and low. Land elevation ranges from sea level in the West to about thirty to thirty-five (35) feet above mean sea level in the East. The two major drainage patterns are the Caloosahatchee River that empties into San Carlos Bay, and the rivers and creeks that empty into Estero Bay. The rivers and creeks that exit into the Gulf of Mexico are the Caloosahatchee, Sanibel, Estero, Imperial, and Orange Rivers. The major creeks in the County include Mullock, Spring, Hendry, Whiskey, Yellow Fever, Hancock, Daughtrey, Powell, Popash, Jug, Stroud, Otter, Telegraph, Billy, Hickey, Bedman and Cypress.

CONCEPT OF OPERATIONS

AUTHORITY LINE OF SUCCESSION:

ROCB/BoA President and CCC/ BoD Chair or designee(s)
Community Manager(s) or designee(s)
ROCB/CCC designated on-site board member(s)
Volunteer(s)

BOARD RESPONSIBILITIES

The primary functions of the BoA and BoD are pre-emergency event planning and post-disaster recommendations. The Boards will meet on a continuing and regularly scheduled basis in-person or via zoom meetings. The Board’s responsibilities include, but are not limited to:

- Providing guidance and soliciting feedback on the recovery and reconstruction process.
- Identifying opportunities to mitigate future loss of life and property damage.
- Developing procedures that promote the mitigation of future emergency event damage.
- Making recommendations for participation in local, federal, and state post-emergency event hazard mitigation planning.
- Evaluating damaged common facilities and formulating mitigation options (i.e., repair, replace, modify, or relocate).

The boards are responsible for preparing the CEMP, and for updating the CEMP as needed. The boards are expected to review the Plan and make any corrections, updates, or changes and to relay this information to the community.

PUBLIC AWARENESS

The BoA/BoD member or designees may send communications, upon approval of ROCB/BoA President and CCC/BoD Chair or designees to the Carefree Office to be sent out via email blasts. The free LeePrepares smart phone app sends push alerts when an evacuation order has been issued, gives real time evacuation information, provides a list of open shelters, locates our evacuation zone, displays current weather and hazardous weather outlooks, provides recovery information, and links to social media sites. All Carefree owners and renters are encouraged to download this app to stay abreast of localized emergency information. The Emergency Management Website (www.LeeEOC.com) also provides visitors with the Evacuation Zone Map ([Evacuation Information](#)), showing evacuation routes and listing shelters, as well as templates to create Family Emergency Plans and build emergency *go kits*. All residents are encouraged to download and complete these documents and update them each year. The Carefree website also provides these links and the Lee County All Hazards Guide to all owners, renters, and visitors. These guides are free and can be ordered by calling the Lee County Department of Emergency Management at 239-533-0622. The guides will be available in the office and conference room and will be reordered as needed. Carefree is in Evacuation Zone D, which is indicated in green on the Evacuation Zone Map.

Because Carefree residents live in manufactured/mobile homes and recreational vehicles, they will be the first to receive an evacuation order during a tropical cyclone, regardless of being in Zone D.

WARNING SYSTEMS

Residents should ***get emergency communication from official channels***, both local and national, such as Lee County (alertLee), the American Red Cross, the Florida Department of Agriculture and Consumer Services (wildfires), the National Weather Service, etc. If possible, the ROCB/BoA President, CCC/BoD Chair, or designees may activate the mass notification system (Calling Post). Owners and renters must opt-in to the alert system to receive updated text messages. If possible, Calling Post texts will be created by the BoA/BoD member or designees for various types of fast-moving emergency situations, such as an active threat, tornado, wildfire, etc., so that the system can be used quickly and effectively.

FINANCIAL MANAGEMENT

During an emergency, the BoA President, BoD Chair, and BoA/BoD treasurers are responsible for complying with all fiscal policies and regulations, coordinating funding, approving all incident issues and expenses.

Response and Recovery Overview

PURPOSE

This Section provides an overview of the response and recovery process used to respond to an emergency. The major recovery activities are listed under each recovery period. Specific attachments providing additional information are also included.

SCOPE

Response and Recovery procedures will reflect operational priorities to include:

1. Property protection
2. Environmental protection
3. Restoration of essential utilities
4. Restoration of essential program functions
5. Coordination among appropriate local and national agencies

RESPONSE PHASE

Response and Recovery efforts vary with the size and level of impact of the emergency. We will work with vendors who bring their own experience gained from responding to emergency incidents to Carefree's response and recovery efforts.

RESPONSE TO RECOVERY PHASE

Moving from response to recovery is not a linear process. For example, emergency sheltering (response) will still be in progress while some of the sheltered will be moving back into the community (recovery).

RECOVERY PHASE

Activities may be added, deleted, or changed as conditions dictate. Recovery activities are grouped into three (3) major phases:

- 1) Immediate Emergency Period
- 2) Short-Term Recovery Period
- 3) Long-Term Recovery Period

EMERGENCY ORGANIZATION STRUCTURE

Executive policy makers provide overall organizational direction. Executive policy makers are comprised of the various members from the ROCB/BoA and the CCC/BoD. They develop overall policies and goals to guide recovery efforts and execute financial and legal decisions necessary to support recovery efforts.

PRINCIPLES GOVERNING RESPONSE AND RECOVERY ACTIVITIES

The transition from response to recovery is different for every event and many parameters are inexact and subjective. Carefree boards evaluate eleven (11) individual parameters. The evaluated parameters are listed below:

1. Damage Assessment
2. Communications
3. Roads
4. Emergency Services
5. Electricity
6. Water
7. Sewer
8. Clubhouse/Office
9. Debris
10. Telephone
11. Food, Water, Ice

RECOVERY ACTIVITIES

In a major or catastrophic disaster, the Carefree CEMP helps guide redevelopment and hazard mitigation activities. ***This includes all phases of recovery and should involve photos/videos for insurance purposes, prior to making any alterations, repairs, cleanup, etc. Photos/videos need to be date and time stamped.***

The major activities carried out during each phase are summarized below:

IMMEDIATE EMERGENCY

- BoD/BoA or designees contact insurance company; start claim process (BoD/BoA or designees coordinated)
- Enactment of special ordinances by local and national authorities
- ROCB/CCC property and environmental protection
- Assessment of initial impact
- Coordination with the Carefree community
- Implementation of legal/financial procedures
- Volunteer coordination
- Resource management
- Emergency debris clearance
- Emergency communications, if possible

SHORT-TERM RECOVERY (RESTORATION)

- Re-Entry
- Restoration of essential operations
- Detailed damage assessment, including photos/videos (date and time stamped)
- Temporary repairs to facilities
- Debris clearance, removal, and disposal (BoD/BoA coordinated)
- Contact local/national authorities, such as FEMA (BoD/BoA coordinated)

LONG-TERM RECOVERY (RECONSTRUCTION)

- Contact local and national authorities to advise on natural resource restoration
- Carefree community recovery
- Permanent facility repair/reconstruction
- Hazard mitigation
- Complete restoration of infrastructure
- Risk assessment/review

SPECIFIC HAZARD PLANS OVERVIEW

WILDFIRE

- The Florida Department of Agriculture and Consumer Services (wildfires) has up-to-date information on wildfires, and residents should be encouraged to use this service. If possible, activate Calling Post.
- Evacuate out the front entrance and rally at the Old Publix parking lot (near the Brunch Place), just north on Hwy. 41, 0.8 miles on the same side as Carefree Resort.
- If the front entrance is blocked by fire or other hazards, go to the Carefree Clubhouse and rally in the back between the pool and lake, and await the response from local firefighters.

ACTIVE THREAT (such as armed intruders, wildlife, or law enforcement activities)

- If possible, activate Calling Post.
- Get off the streets and shelter in place. Lay down, or crouch in your home away from windows, preferably with a heavy object, such as an appliance, between you and outside walls. Silence your cell phone. Turn off lights. Close curtains.
- Evacuate when ordered to do so by law enforcement or other emergency personnel.
- When the police arrive, do not have anything in your hands that can be misconstrued as a weapon. Raise empty hands, remain calm, do not ask questions, and follow instructions.
- Do not attempt to move wounded. Apply pressure, elevation and/or tourniquets for injuries when you can safely do so. Note what time a tourniquet was applied and wait for professional first responders.
- If in the clubhouse during an event, move into interior rooms and away from doors. Silence cell phones. Under no circumstances should you leave your place of cover until an all-clear is given by law enforcement.

TROPICAL CYCLONES/TORNADO

Tropical Depression: A tropical cyclone with maximum sustained winds of 38 mph (33 knots) or less.

Tropical Storm: A tropical cyclone with maximum sustained winds of 39 to 73 mph (34 to 63 knots).

Hurricane: A tropical cyclone with maximum sustained winds of 74 mph (64 knots) or higher.

- **In the event of a hurricane, the clubhouse will be shuttered and locked.** All summer residents and visitors may sign up for the Calling Post Summer Resident list to receive notifications and warnings regarding tropical cyclones. *The FCC requires an individual to opt-in to this service.* Provide your information to the boards or the office if you will be in residence during the summer months.
- Residents should get emergency communication from official channels, both local and national for evacuation announcements. All Recreational Vehicles must be moved from

the park unless anchored down according to BoA Rules (See Covenants and Restrictions C & R 3.1.26.3) for current anchoring requirements. (Current anchoring is defined as concrete anchor brackets with a minimum of 4 straps, bolted into the cement pad under the RV.)

- An official *tornado warning* means a tornado has been spotted by local or national authorities. Take cover immediately. If in your home, go to an interior room. If on the street, during a tornado, use the clubhouse as a Refuge of Last Resort (ROLR). All pets must be in crates. Note that the clubhouse is not rated for hurricanes nor tornados and use of this ROLR is at your own discretion and risk during a tornado. Carefree and its representatives assume no responsibility for your safety or accept any responsibility for injuries sustained while using the ROLR.
- All Carefree residents have access to an All Hazards Guide and Family Emergency Planning Template provided here: <https://www.leegov.com/publicsafety/emergencymanagement/plan/ahg>, which is usually available by May 1st of each year, or found in the Carefree Clubhouse library or on leeeoc.com.
- All residents must evacuate when ordered. The BoA/BoD or designee(s) will inform residents on whether it is safe to re-enter The Resort on Carefree Boulevard and provide information about impacted areas, damage to infrastructure, safety protocols, debris removal plans etc.

PANDEMIC/HEALTH EMERGENCIES

- The Carefree BoA and BoD will follow all recommended CDC and Lee County Health Departments guidelines for health-related emergencies. This information will be communicated to residents and visitors through emails and via social media. Signs will be posted in all common areas for personal protective equipment requirements. Please adhere to the posted guidelines.

LEADERSHIP SECTION

This Section describes the overall responsibilities of the Leadership Section. Leadership consists of ROCB/BoA President, CCC/BoD Chair, and Carefree Management. Additionally, this section contains a brief description of these responsibilities.

BOARD/MANAGEMENT RESPONSIBILITIES:

The boards and management are responsible for the overall management of all aspects of the emergency. They may delegate these responsibilities to others. Activities not specifically delegated remain the responsibility of the boards and management. Responsibilities include:

- Develop and assess disaster incident priorities.
- Determine strategic goals.
- Determine broad objectives.
- Develop appropriate organizational structure to manage emergency incidents.
- Coordinate activities with outside agencies/vendors.

FINANCE SECTION

This section describes the role of the board treasurers. Their primary role is to document expenses incurred due to an emergency for potential cost recovery.

PURPOSE

During a disaster, the ROCB/BoA President, CCC/BoD Chair retains the authority to execute funding agreements with other legal entities. Each agency participating in the response will document their costs to the best of their ability and follow Carefree procurement policies. The Finance Section maintains accurate records for personnel and equipment costs incurred by Carefree.

Finance Section duties:

- Maintain accurate cost information regarding the emergency
- Maintain appropriate financial records to maximize reimbursement
- Ensure appropriate Carefree purchasing, financial, and accounting procedures are utilized
- Manage contracts and procurement issues
- Keep payroll records as required
- Document and process claims resulting from the response efforts
- Provide best practices related to financial documentation and cost recovery to all EOC partner agencies.

DOCUMENTATION & REIMBURSEMENT

Proper documentation is required to qualify for reimbursement for eligible expenses. In major or catastrophic disasters, a separate project code (budget item) may be established to manage disaster related costs. These costs include labor, materials, equipment, supplies, and contracts. Persons directing or supervising emergency work must document personnel, equipment, and supplies expended daily. Every reasonable effort is made to foster competition for work. Those responsible for procurement and supply ordering can, and should, solicit proposals by phone or other means from three (3) vendors and work with management staff on proper process while ordering resources.

CONTINUITY OF OPERATIONS

All documents must be stored on the cloud server and the ROCB/BoA and CCC/BoD leaders must be provided with passwords and access to said documents. Documents to be stored electronically or physically include:

- Checkbooks/cash/credit cards must be removed from the safe. If it is after hours or during the weekend, ROCB/BoA and CCC/BoD leaders must access the safe to remove this confidential information. Combination codes and keys will be kept in a secure location outside of the clubhouse.
- List of authorized check signatories
- Laptops
- List of investments, financial accounting, and tax records
- Bylaws, Articles of Incorporation, C&R's, and Rules and Regulations
- Current member roster, mailing addresses and Parcel ID
- Current vendor and management contracts.
- Insurance policies
- Internal control documents

FINANCIAL PREPARATIONS

The Planning Section will provide a detailed list of damages to Carefree properties to the Treasurer(s) or designee(s). Leadership will contact the insurance company each year to review insurance policies and update contact information, as needed. The following is a checklist of considerations:

- Assess policies.
- Update contact information.
- Report damaged property, even if full extent is not yet known.
- Request adjustors' contact information and timeline for review.
- Photo/video all clubhouse property on an ongoing basis.
- Photograph, video record and document all damages BEFORE removing debris.
- Retain damaged property until it has been documented by the claims adjustor.
- Record expenses for loss, temporary repairs, and cleanup.
- Keep a file with recent repairs and renovations.
- Request office facilities and cell phones and determine what is covered.

BOARD DUTIES PRIOR TO HURRICANE SEASON (MAY)

- Present motion at board meeting to activate specific volunteer committees.
- Ask residents to submit or update Calling Post summer registration forms.
- Video/photograph for ROCB:
 - mail kiosk, front gate area, trash area, fence areas, aerators in lakes and shell paths, and examples of street and stop signs. (Board member or designee)
 - ROCB grounds to include streetlights, street signs, etc.
- Video/photograph for CCC:
 - Internal/external clubhouse (include office equipment and any other expensive equipment)
 - clubhouse grounds
- Send email to remind residents to download alertlee and other emergency apps to their phones.
- Reiterate in the email the clubhouse will be closed, is not a shelter, and may not be used.
- Prepare "On the Roc" and "Safe" signs for the community to obtain and use during a storm and email instructions to the community.

CONE OF CONCERN

Determine criteria for what should be done during a tropical storm warning.

- The Preparation Meeting will determine the phases that need to be executed.
- Communication from manager(s) regarding weather situation.
- Contact long-term renters (use the long-term rental list in the office).
- Preparation meeting:
 - delegate tasks.
 - bring up concerns.
 - discuss communication.
- Manager(s) communicate with the boards daily.
- Conduct coordination meetings as needed per day/per week:
 - to include manger(s), board members, maintenance, office, and technical staff.
 - Determine the next steps at each meeting.
- Daily community communications, as determined by the current conditions.
- Execute the system used to indicate if an owner is on the ROC and to mark “Safe” after the event.

HURRICANE WATCH (MAY BE USED DURING TROPICAL STORM WARNING)

- Send email(s) to residents to remind them: Internet services may be delayed or disrupted and to remove limbs encroaching on their homes, and secure potential projectiles.
- Reiterate in the email the clubhouse will be closed and locked, is not a shelter, and may **not** be used.
- Send email to ROCB, CCC, and Tech Support (techsupport@rocbfl.com and techsupport@clubhousefl.com) to verify backups are up to date.
- Verify and extend, if necessary, Calling Post credits.
- Procure vendor list.
- Check common areas for debris or loose objects (potential projectiles).
- Print Summer Resident List and Hurricane Check List.
- Give the lists to an onsite board member or designee.
- Call 239.543.1005 ext. 121 to request a **generator** before the storm.
- Call 239.543.1005 ext. 121 to request the lift station #39 be emptied.
- Notify community of meeting place (clubhouse parking lot) for volunteers to help prepare.

POOL AREA

- Retrieve tarps from maintenance shed and place on the floor in the billiards room.
- Place the following pool equipment inside the billiards room:
Pool deck/chaise lounge chairs, umbrellas, clubhouse trash cans
- Place poolside tables upside down on upper pool deck.
- Remove spa clock and place in the lounge on the countertop
- Remove pool area signs and pool cleaning tools and place in maintenance storage room.
- Top off propane tanks for grills
- Remove gas grills and store in maintenance storage room or on plastic in lounge.

CLUBHOUSE AND GROUNDS

- Remove pickleball trash cans and store in shed.
- Remove storage bins from bocce and pickleball courts and store in shed.
- Remove pickleball windscreens and store in shed.
- Remove portable pickleball nets.
- Remove and store firepit cover.
- Flip all benches and the swing seat edge and back edge down (see Benches diagram).
- Remove all flags and store in office.
- Install shutters (See Shutter instructions)
- Lock all inside doors except #1 (laundry) and #4 (main entrance).
- Remove outside kitchen trash cans and store in electric room.

FRONT GATE AREA

- Remove trash area gate tarps (store in maintenance office)
- Place poles, trash cans for aluminum recycling in corner behind recycle bin.
- Turn off sprinkler systems at gate area and store hose reels behind recycle bin.
- Remove all free standing/loosely displayed signs at front gate.
- Secure trash gates to keep them closed.
- Secure gates in the open position and stake to prevent movement

HURRICANE WARNING

- Shut off gas to dryers at the main supply in maintenance outside shed on wall bottom.
 - Unplug all equipment: washer, dryers, tv, exercise equipment
 - Turn off water heaters.
 - Turn refrigerator/freezer temperatures to lowest setting.
 - Shut down all pool and spa equipment. (Includes main breakers in pool pit.)
 - Lock pool/spa pump covers in pit.
 - Store golf carts behind shutters with chargers.
 - Move gasoline storage bin to outside shed.
 - Secure drinking water bottles for volunteers.
 - Move at least one, long, white table (from salon) to accessible area for use after the storm.
 - Secure chain saws and other cleanup equipment in shed for easy access after storm.
- Unplug computers, printers, and routers; **do not cover with plastic.**
 - ***Network switch, server, admin computer, and the copier are surge protected and on an APC.***
 - Make sure sensitive equipment is off the floor.
 - **Do NOT unplug the APC!** (uninterrupted power supply)
 - Record a phone message, and let people know how to communicate
 - Procure Summer Residents list.
- Lock #1 and #4 doors from the inside.
 - Install last 2 shutter door strips from the outside.
 - Post "No Access" signs.
 - Conduct final check of hurricane shutters (locked and secured).
 - Secure front gates (exit and entrance) in open position.
 - Clubhouse will remain closed and shuttered until power and water are restored.

POST HURRICANE

- Video/photograph storm damage.
Include: mail kiosk, front gate area, trash area, fences, stop/street signs, shell paths, aerators in lakes.
- Video/photograph:
Internal/external clubhouse (include office equipment and any other expensive equipment) clubhouse grounds.
- Determine status of lift station.
- Assess water/sewer lines.
- Check front gate for damage and functionality.
- Communicate with onsite individuals.
- Notify residents of debris cleanup procedures:
Debris may be left in 3' area to curb in front of residence.
Placed in yard waste container.
Placed in individual bins and left in driveway.
- Separate aluminum/metal debris and plant debris into separate areas
Ultimately, *separated* debris may be placed along the entrance road.

CHECKLIST

SHUTTERS

Group lead must have shutter keys and installation map.

- Shutter bottom tracks are inside maintenance office near the door.
- Each track is numbered according to its position and coincides with the the number located on the **left inside** shutter door frame.
- Shutter numbering is as follows:
Door #1 - laundry room, continue toward the office and around building.
The last shutter is #17 (entrance to clubhouse by maintenance office)
- All shutters will be installed at this time except:
The laundry room and the front doors (#1 & #4)

All doors should be locked from the inside at this time (except for #1 & #4)

- 1) Remove all silver screws from cement at each doorway.
Use caution when removing/installing screws as they are easily stripped.
- 2) Position corresponding track and reinstall screws into the track.
- 3) Make sure to unlock shutter and loosen aluminum rods at each side of lock.
Must be reinserted into corresponding holes (top & bottom) when locking is closed.
Once installed, shake shutters to make sure they are locked and do not come
- 4) apart.

POOL AND SPA SHUTOFFS

Pool and Spa Shutoffs – located inside locked fence outside maintenance room, near pool.
Brian’s keys are always on the desk in the maintenance room. One of those keys unlocks this area.

When you enter the area, you will immediately see two large white boxes.

The first one houses the spa pump and acid shutoffs. Lift the cover for access.

UTILITY SHUTOFFS

As you enter the outside maintenance room, the cutoff is on the right wall and down.

The electrical room is located to the right of the laundry room entrance.

Main shutoff is all you need to turn off.

GAS SHUTOFF LOCATION

On the left wall as you enter.

ON - vertical OFF - horizontal

BENCHES (37)

Flip benches over so top of bench back is on the ground.

Clubhouse area:

- 6 Bocce area plus the swing
- 8 Shuffleboard court
- 3 Pickleball court

On the street:

- 1 Eleanor behind A-1 on shell path
- 3 Golda between G-80 and G-86 and next door to G-22
- 2 Rosa on the cul-de-sac
- 3 Willa on the cul-de-sac

Around Lake Phyllis:

- 1 Behind M-11
- 1 Behind M-17/19
- 1 Behind M-23
- 1 Behind M-29
- 1 Behind E-18
- 1 Behind E-24
- 1 Behind E-30

Around Lake Talitha:

- 1 Behind G-62/64
- 1 Behind G-66
- 1 Behind G-74
- 1 Behind G-78
